Principles of Property Assessments

Proposition 13

- Passed by California voters in June 1978
- It is a contract between taxpayers and the government. It provides a budgetable revenue source for taxing jurisdictions and is affordable and predictable for property owners
- Property reassessed upon a change in ownership or new construction
- Assessed Values are established as of January 1st (Lien Date)
- Assessments subject to an annual inflation adjustment, not to exceed 2% per year

Proposition 8

- Passed by California Voters in November 1978
- Provides for a temporary reduction in assessed value if the market value falls below the assessed value on Lien Date
- Once reduced, the value will be reviewed annual and adjusted upward or downward, dependent on the market value
- Still protected by Proposition 13. Can never go higher than the original assessment plus 2% per year

Proposition 13 Protects Tax Receivers

- The provisions of Proposition 13 insulate the property tax base from short term downturns in the real estate market as seen post-2006.
- The market downturn in 2007-2012 resulted only in a flattening of the assessment roll; no substantial decreases.
- In 2022, when home prices were flat YOY, total assessed values and tax revenue grew by over 7%
- As of Lien Date, 1/1/2023, the San Diego County median home price was \$750,000; 45% higher than its last peak in 2006. In that same period, total assessed values and property tax revenue had increased by 103%.

Note: Median Home Price includes sales of new and existing single-family residences through 1/1/2023

Proposition 13 and Proposition 8 Protects Taxpayers

- Proposition 13 limits annual property tax increases to 2%, based on the consumer price index (“CPI”) regardless of percent changes in real estate values.
- Proposition 8 provides for a temporary reduction when real estate values drop below the Proposition 13 cap.

While sales volume decreased, strong home prices led to robust AV growth

- ❖ Home sales volume at its lowest level since 2007, and a 22% decrease YOY
- ❖ Average value increment for Residential change in ownership reassessments was \$422,817, an all time high, and +24% YOY
- ❖ Average value increment for Commercial change in ownership reassessments is \$2,650,236, an all time high, and +20% YOY
- ❖ Prop. 13 caps the annual CPI Adjustment at +2%. This was applied to 91% of all properties in the County, adding a record \$12.38 billion to the Assessment Roll
- ❖ Even with strong median home prices, fluctuation in 2022 led to over 18,000 Prop. 8 reductions, made proactively, saving homeowners \$15 million in 2023-24.
- ❖ The 2023-2024 San Diego County Assessment Roll grew at a rate of 7.12% before exemptions (Gross) and 7.14% (Net)
- ❖ 2023-2024 was the 11th straight year with positive roll growth in San Diego County

Outlook for 2024-2025: 3.5% AV Growth

- Home sales volume continues to decrease. Recorded deeds are down 27% through June 2023.
- Higher interest rates are decreasing home affordability; however, prices remain strong due to low supply. On May 31, 2023, San Diego County median home prices were \$935,000 (detached) and \$630,000 (attached), \$822,000 (combined) according to Core Logic.
- Proposition 8 temporary AV reductions are not expected to increase on homes, but may be reflected in the commercial office sector.
- High inflation may lead to less new construction, due to increased costs.
- A 2023-24 CPI adjustment of 2%, applied to over 90% of all parcels, will add another \$12 billion to the assessment roll, adding +1.80% in AV growth alone.
- Projecting assessed value growth of 3.5% County-wide

The name of the beautiful valley of Poway (Pauwai) is derived from the language of the Diegueno and Luiseno Indians who roamed the area for several hundred years before the Spaniards came. Traces of these Native Americans still remain. In December 1980, Poway incorporated as a full-service, general law city, which operates under the Council / Manager form of government.
